

Mahmudur Rahman

AI Product Engineer • Product Builder

Dhaka, Bangladesh • Remote Worldwide | mahmudurshakib7@gmail.com | [LinkedIn](#) | [GitHub](#)

I own the path from idea to production. My background spans textile engineering, international B2B commercial operations, and entrepreneurship — experience that now shapes how I build software. I pair product judgment and UX thinking with full-stack, AI-native execution to turn ambiguous ideas into working digital products.

EXPERIENCE

Independent Product Builder / Product Engineer

Aug 2024 – Present

WARPIX Studio since Nov 2025 • Dhaka, Bangladesh / Remote

- Built and operated owned product ventures across commerce, marketplaces, proptech, and content — SOOK (operating), SUQO and Amar Basha (pre-launch), and Athar House (in development) — owning product definition, UX, full-stack build, QA, and deployment.
- AI is leverage; ownership is the skill — I direct AI agents across specification, implementation, debugging, and testing while retaining responsibility for architecture, edge cases, and production quality.

Senior Executive (promoted twice) — Experience Group

Dec 2021 – Jul 2024

Dhaka, Bangladesh

- Promoted twice during a 2 year 8 month tenure, progressing from Junior Executive to Executive in approximately six months and later to Senior Executive. Coordinated fabric orders and commercial execution for LC Waikiki and New Look across client communication, manufacturing timelines, and delivery accountability.

SELECTED PRODUCTS

SOOK • Operating

Next.js • Cloudflare

Fashion commerce business I operate day-to-day — product discovery, promotions, merchandising, and the customer journey end to end.

SUQO • Pre-launch venture

Next.js • Laravel • Filament • MySQL

Long-term multi-vendor marketplace venture for Bangladesh. Built the storefront and operational backend — shops, products, variants, inventory, promotions, orders, returns, and admin — and moving toward onboarding shops.

Amar Basha • Pre-launch venture

Search UX • Responsive architecture

Commission-based property marketplace positioned as a curated, premium alternative to broad classifieds. Apartment sales first, built around search, filtering, curated listings, and a direct path from listing to enquiry.

Athar House • In development

Next.js • Content UX • IA

Mobile-first Islamic knowledge-discovery product organized around lectures, recitations, scholars, and topic-led navigation.

MacroPlate • Prototype

Meal-subscription product prototype covering menu discovery, dietary filtering, plan selection, and a recurring ordering journey.

TECHNICAL STACK

Frontend: HTML, CSS, JavaScript, React, Next.js

Backend / Data: Laravel, Filament, Supabase, MySQL, Cloudflare D1, REST APIs, Auth

Infrastructure: Cloudflare Workers, Cloudflare Pages, Vercel, DNS, deployment, production QA

AI-Native Workflow: Codex, ChatGPT, Claude, agent orchestration, AI-assisted debugging & QA, test generation

EDUCATION

BSc, Textile Engineering & Management — BGMEA University of Fashion & Technology

2016 – 2021
